

NEW from Visplay: Mono R 4

Mono gives structure to wall panels using points. Mono holders blend in with the architecture and can be used at any height. The selective use of Mono creates a uniform, neat merchandise display, which facilitates merchandising. The merchandise support is simply inserted into the holder and secured with a catch. The Mono range offers seven square, rectangular and round versions with matching merchandise supports for a whole range of requirements. There are holders for lightweight and heavy merchandise, for plasterboard and wooden panels, for integration in a panel and for fixation to the panel front.

The latest addition to the Mono family of single point support systems is the version Mono R 4. The rectangular plastic holder (h 4 mm / w 30 mm) in silver and white was designed for the numerous small, light-weight items, which are mainly displayed on shelves. The product range includes various individual shelves, front arms, hook rails, sign holders and universal brackets for individual shelves, in a range of different materials. The special non-rotating feature of the holder and adapter guarantees precise positioning of merchandise supports with a snug-fit.

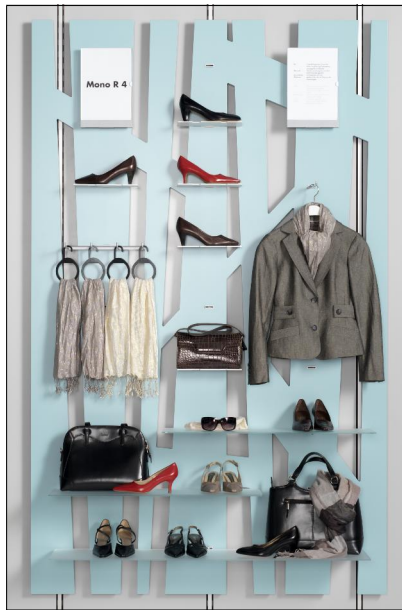

Mono R4 is a particularly economic system which offers an interesting, high-quality display and is ideal for the merchandising of shoes as well as of accessories, mobile phones, perfumes and beauty products and sports items.

Visplay – modular systems for commercial interiors.
